Education

Integrated M.Tech in Artificial Intelligence, Vellore Institute of Technology 2022 – 2027
• CGPA: 8.71/10

Technical Skills

- **Programming:** Python, Java, SQL, C/C++
- **Application Development:** Flask, REST APIs, modular design, debugging, testing (unit testing basics)
- **Data & Systems:** ETL pipelines, SQL queries, data processing (pandas, NumPy)
- **Tools:** Git, Docker, Linux, Jupyter
- **Visualization:** Power BI, Tableau, matplotlib
- **Core Skills:** Problem solving, system design, debugging, documentation, code optimization

Relevant Coursework

Database Management Systems; Data Structures & Algorithms; Machine Learning; Deep Learning; Numerical Linear Algebra; Optimization Methods; Computer Vision; Operating Systems; Computer Networks; GPU Computing.

Projects

- **UIDAI Data Hackathon - Aadhaar Biometric Risk Analysis** [[GitHub](#)] Feb 2026
Python, SQL, Data Pipelines, Power BI
 - Designed and implemented an end-to-end data pipeline for processing large-scale biometric datasets.
 - Defined problem scope, built analytical models, and delivered actionable insights via dashboards.
 - Ensured code quality through structured workflows and reproducible outputs.
 - **Selected for Stage-2 presentation at UIDAI Hackathon.**
- **Autism Screening Web Application** [[Live](#) | [GitHub](#)] Jan 2026
Python, Flask, Docker
 - Developed a web-based application integrating backend ML pipeline with user interface.
 - Built modular and scalable architecture; containerized using Docker.
 - Performed testing and validation of models using standard metrics.
 - Improved system reliability through debugging and iterative enhancements.
- **Driver Assistance System - Swerve Detection** [[GitHub](#)] Nov 2025
Python, ONNX, Real-time Systems
 - Built real-time data processing pipeline for vehicle behavior analysis.
 - Optimized model performance for deployment using ONNX and quantization.
 - Focused on latency reduction and efficient execution.
- **Currency Classification with Voice Feedback** [[GitHub](#)] Aug 2025
Python, OpenCV, Embedded ML
 - Developed lightweight application for real-time currency recognition.
 - Integrated voice output system for accessibility.
 - Ensured robustness through dataset augmentation and testing.

Research Publications

- **Lightweight CNN with SE Attention for Brain Tumor Classification** (2025, under review). Compact SE-CNN optimized for deployment; 99.24% accuracy.
- **Comparative Study on Output Modes in Object Detection & Distance Estimation**, IATMSI 2025. [DOI](#)
- **Speech-Based Visual Aid for the Blind Eye using Deep CNN**, ETNCC 2024. [DOI](#)

Achievements

- Dr. Kalam Young Achiever Award- Oct 15, 2025. (For *Jyoti: Currency Classification with Hindi Voice Output.*)
- Raman Research Award, VIT Bhopal- Mar 2025. (Outstanding undergraduate research in machine learning.)
- 2nd Prize, Poster Presentation, Industry Conclave- Aug 3, 2024. (Project: Speech-Based Visual Aid for the Blind Eye.)

Certificates

- [Applied Machine Learning in Python \(Coursera\)](#)
- [Simulink Onramp Course \(MathWorks\)](#)
- [Cloud Computing \(Elite + Silver\) \(NPTEL\)](#)
